- c. The pressure of water can be obtained through any ISI marked pumps which are reliable, easy to maintain and affordable.
- d. These pumps should be easily handled by women teachers, students and staff without any special training.
- e. These pumps should be flexible to draw water from normal taps or sump or drain or any water source available in the building.
- f. Water in sump or overhead tank that can be used for initial firefighting purpose should be reasonable to last for half an hour.
- g. You are not obligated to buy from any particular vendor or hire any particular contractor or be guided by any liaison officer or middleman to install fire safety equipment.
- h. Please don't use water sprinklers in any computers, electrical or chemistry labs as they will compound the problem.
- i. Use CO₂ Cylinders or Dry Chemical powder fire extinguishers @ every floor with one per 15 meters and in every lab.

5. Smoke Test: In case of fully Air conditioned buildings, in most fire accidents, it is smoke that suffocate and kills. Fully air conditioned buildings are generally sealed and there is no vent for smoke to escape. Therefore, we are mandating smoke management which is ensured through "Smoke Test". (This is not applicable in case of partial air conditional buildings where smoke can easily disperse into air unlike in fully covered buildings).

- a. "Smoke Test" tests to ensure the staircases free from smoke for about 2 hours to enable all students, teachers and staff to evacuate from the building in case of any fire accident.
- b. Make sure air conditioner ducts don't compound the problem by carrying smoke to all parts of the building.
- c. Fire proof materials such as iron doors, iron shutters, thick glass, curtains that can shield smoke can be used.
- d. Also exhaust fans that are connected to standby power source can be installed to evacuate smoke from staircases or exit paths.

6. Where schools are not permitted:

- a. In thatched roof or any inflammable material roof (Plastic sheets etc.,) buildings.
- b. In cellar or basement of buildings.
- c. In mixed occupancies where the ground floor is occupied with any shops particularly cloth, chemicals or any toxic inflammable materials.

7. Any clarifications, you are welcome to meet the DG, Fire Services (9441236448) without appointment in his office as ensuring fire safety with better and affordable technology is a continuous learning and collaborative endeavour.

Your sincerely,

Director General
State Disaster Response & Fire Services
